SUBJECT INDEX

January–December, 1956

In using this index, look under specific subjects. If information wanted is not under specific subject, look under a broader heading. Wherever possible, look under specific *process*. For example, information on the dyeing of cotton will be under DYEING—Cotton (*not* under COTTON—Dyeing). For fiber information not involving specific processes (as properties, etc.), look under the names of fibers. Use cross references and look also at other headings beginning with the same word. For many processes there will be separate headings for machinery, as DRAWING and DRAWING MACHINERY. P indicates a patent reference.
